CREATIVES BEST PRACTICES

DO’S

PRE-LANDER

- Use pre-landers only if it’s allowed by the advertiser. Ask a manager or Support team in your CPA-network for the best "pre-lander + landing page" combination.

- Include FAQ section to provide even more useful info to potential customers.

- Add reviews and testimonials to increase trust. Additionally, you can add reviews looking like chat messages.

- Explain the steps: how to start trading? How to get a credit card?

- Have media mentions? Add them to your pre-lander to show that the offer is legit.

- Talk about privacy: explain how all the transaction and private data are protected.

- Experiment with your forms and CTAs.
Employ storytelling: format your pre-lander as a blog page written by a regular person or a news article to better engage the audience and add trust.

Use the sense of urgency: “Offer expires in 2 minutes”, countdown timers and dynamic content: how many people are viewing this offer now, recent customers, etc.

Add interactivity (can be provided by the advertiser): calculators, tools, etc.

Images

Use images of money, stock exchanges, finance buildings, or bank/business people for trading / investment products.

If you have the “simple person got rich” story on your pre-lander, pick a realistic photo for creatives, don’t use stock images.

Does the Bill Gates Bitcoin Trader System Really Work?

Flora Mason: “When you’re old, you think it’s not about money, but it turned out to be the best decision of her life.” (Image: Daily Mail)

Flora added: “At first, I thought it had to be a scam, but I figured I’d try it anyway. I had nothing to lose. I watched the video and signed up. It was actually pretty fun to learn how to do this. Cash was coming into my bank account so fast, I didn’t think it was real. I wasn’t positive that I would receive a payout.”

The Most Important Tip For Bitcoin And Millionaires

Panos Mousdoukouzis, CONTRIBUTOR

Opinions expressed by the contributor are their own.

Of all the tips Bitcoin, Powerball and other quick millionaires can get from experts, one stands out: don’t treat backed money differently than hard earned money, because you run the risk of losing part or all of it.
For investment products, test the images with the attributes of luxury life: expensive cars, watches, yachts, modern buildings, etc.

Place numbers (percentage) on your banners.

Underline convenience and simplicity: “Make money from home,” “Start investing with pleasure,” “Register in [Name] platform and you’ll never work again.”

State facts: “Make up to $324 daily,” “You can invest in Amazon CFDs,” “Earn 6% extra interest.”

Talk about how fast and easily a user can get his money. Use words like “Fast,” “Instant,” “Easy application,” “High approval rate,” “Reward program.”

Mention licenses and authorities: “Licensed by FCA and CYSEC,” “In compliance with Indonesian laws.”

Make sure to add risk warnings and all kinds of disclosures, required by the advertiser and legal authorities.

TARGETING TIPS

If you’re just starting with this vertical, pick GEOs with the lowest competition. For example, offers for Asia (PH, TH, ID, etc.)

Test device and OS targeting: Mac OS and iOS usually have a very high CTR, while Android has the biggest traffic volumes.

Use language targeting for countries speaking 2 or more languages - for example, Canada: French and English.

If you don’t get enough traffic volumes, and you can’t change the bid - increase the frequency.

BIDDING AND OPTIMIZATION TIPS

For Push Notifications, A/B test your creatives with Smart Rotator to understand which creative set has the highest CTR. You should test at least 3 creative sets so that each set would get around 1000 impressions.

Play with the bid:
- New campaigns require higher bids. This strategy allows you to test faster: get more traffic and more data to optimize these campaigns.
- If you don’t get enough traffic, but your CTR is high (>2%), you can duplicate this campaign and set the bid higher.
- If your traffic volumes are too low - try wider targeting.
- If your budget is spent too fast, the CTR is high; you can try decreasing the bid or increasing the ad frequency.

Launch separate campaigns for each GEO; also, it’s not recommended to mix different platforms in one campaign.

Check in your tracker what time of the day your prospects are the most active and launch campaigns targeting these hours.

Don’t forget about User Activity targeting - creating separate campaigns can help you save the budget!
